DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 19 and 20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 19 and 20 do not produce a useful, concrete result. For example, a result is not stored, displayed or conveyed to the user.,

Claims 21 and 22 are objected for depending on rejected base claim.

Allowable Subject Matter

Claims 1-10 and 13-17 are allowed.

The primary reason for the allowance of claims 1-10 is the inclusion of the method steps of identifying each critical device (CD) that is employed to affect a position of an associated critical component (CC); identifying a plurality of possible positions (PPco) for each critical device (CD); identifying a plurality of possible combinations (PC), each possible combination (PC) including one of the possible positions (PPcn) for each of the critical devices (CD); and evaluating each of the possible combinations (PC) to identify which of said possible combinations (PCA) adversely effect the output of the machine tool. And adjusting the corresponding critical devices as necessary so that no critical device is positioned in a strategic position that would adversely affect the output of the

Art Unit: 2863

machine tool. It is these steps found in each of the claims, as it is **claimed in the combination**, that has not been found, taught or suggested by the prior art of record

which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 13-16 is the inclusion of the method steps of directly aligning the one of the container and the stem directly to the axis of the other one of the container and the stem by adjusting one of the container and the stem such that the axis of the one of the container and the stem is coincident to the axis of the other one of the container and the stem; wherein a laser transmitter is employed to establish the axis of the stem. It is this step found in each of the claims, as it is **claimed** in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claim 17 is the inclusion of the method step of directly aligning the one of the container and the stem directly to the axis of the other one of the container and the stem by adjusting one of the container and the stem such that the axis of the one of the container and the stem is coincident to the axis of the other one of the container and the stem; wherein a plurality of jack screws are employed to selectively position the container and wherein the step of adjusting the container includes determining an amount and direction in which each of the jack screws is to be rotated. It is this step found in each of the claims, as it is **claimed in**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Demetrius R. Pretlow whose telephone number is (571) 272-2278. The examiner can normally be reached on Mon.-Fri. 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Barlow can be reached on (571) 272-2269. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
